Dear friends and business partners,

We are pleased that you are holding our catalogue in your hands.

This means that you are either one of our existing valued business partners or a potential new customer. No matter whether you are already buying PROMEDICA products or planning on doing so: If you are looking for high quality products with a special focus on aesthetics, which cater to the various everyday requirements of dentists, our product portfolio offers the solutions you have been searching for! All PROMEDICA products are designed to become an integral part of a dentist's everyday work. Our wide product range offers proven classical products, as well as highly innovative products for different and varied application fields.

The broad spectrum of our products and their reliability (owed to our high level of commitment to research and development, as well as our long-standing experience and our strong focus on quality) make them essential for dentists around the world. All our products are manufactured in Germany under highest quality aspects. They are, of course, certified to international standards in accordance with ISO 13485: 2016, guaranteeing production and quality control of the highest level.

Since our company was founded in 1983, we have been fulfilling the needs of dentists and their patients. For us, this does not just mean offering aesthetic, high-quality products, but also the best possible service. What does this mean for you? You can benefit from our strong customer focus, for example when you need support for exhibitions or promotions, when special requirements have to be fulfilled, etc.

Moreover, Covid-19 has made us aware of the fact that we are living in an unsettled world in which trusted and valued partnerships are essential, as they provide a much needed constant. For PROMEDICA, stable, reliable and long-standing business partnerships have always been one of the main priorities. Currently, we have business partners in more than 70 countries around the world, and we are more than happy that you are either already part of this international network or want to become a member of it.

Our international team will be more than happy to be of assistance via email info@promedica.de or phone (+49) 43 21 / 5 41 73.

We look forward to being in contact with you and hope that you will enjoy browsing our catalogue...

Sincerely,

Your PROMEDICA Team

Composan bio-esthetic

Light-curing nano-ceram composite

INDICATIONS

- Fillings of classes I to V
- Reconstruction of traumatically affected anteriors
- Veneering of discoloured anteriors
- Colour and shape corrections for improved aesthetic appearance
- Locking, splinting of loose anteriors
- Repair of veneers
- Core build-ups
- Suitable for composite inlays

CHARACTERISTICS & BENEFITS

- Perfect and permanent marginal seal
- Optimal abrasion resistance
- Universal for all cavity classes
- Comfortable handling, easy modelling
- Nano-reinforced ceramic particles
- Special resin matrix
- Significantly less free monomers
- Exceptional aesthetics
- High colour stability
- Perfect translucency and colour adaption
- Durable, long-lasting restorations
- Outstanding adhesion to tooth substance
- Extremely low polymerisation shrinkage

PRESENTATION

Item No. 2820:

SET: 7 x 4 g syringes (shades A1, A2, A3, A3.5, B2, OA2, BL), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories

Item No. 2821: 4 g syringe, shade A1

Item No. 2822: 4 g syringe, shade A2

Item No. 2823: 4 g syringe, shade A3

Item No. 2824: 4 g syringe, shade A3.5

Item No. 2825: 4 g syringe, shade B2

Item No. 2826: 4 g syringe, shade OA2

Item No. 2827: 4 g syringe, shade BL

Composan bio-esthetic flow

Flowable light-curing nano-ceram composite

INDICATIONS

- Fillings with minimally invasive preparation technique
- Fillings of small cavities and extended fissure sealing
- Blocking out of undercuts
- Lining, coating of cavity walls
- Fillings of cavity classes III to V incl. V-shaped defects and cervical caries
- Repair of composite fillings and veneers
- Luting of translucent prosthetic pieces (e.g. full ceramic crowns, porcelain inlays etc.)

CHARACTERISTICS & BENEFITS

- Reinforced with Nano-Ceram-particles
- Special resin matrix
- Significantly reduced free monomers
- Perfect translucency and colour adaption to tooth substance
- High colour stability
- Optimal flowability and thixotropic properties
- Stress-absorbing material elasticity
- Perfect and permanent marginal seal
- Low polymerisation shrinkage
- Excellent abrasion resistance

PRESENTATION

Item No. 2811: 1.8 g syringe, shade A1

Item No. 2812: 1.8 g syringe, shade A2

Item No. 2813: 1.8 g syringe, shade A3

Item No. 2681: application tips, 100 pieces *

*

Composan LCM

Light-curing micro-hybrid composite

INDICATIONS

- Fillings of classes I to V
- Reconstruction of traumatically affected anteriors
- Facing of discoloured anteriors
- Colour and shape corrections for improved aesthetic appearance
- Locking of loosened anteriors
- Extended fissure sealing for molars and premolars
- Repair of veneers
- Core build-ups
- Especially suitable for composite inlays

CHARACTERISTICS & BENEFITS

- Universal for all cavity classes
- Durable and long-lasting fillings
- Packable consistency
- Sticks to the cavity not to the instrument
- Superior physical properties
- Perfect aesthetics
- High translucency and perfect colour adaption
- Polishable to a high gloss

PRESENTATION

Item No. 2474:

MINI-SET: 2 x 4 g syringes (shades A2, A3), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories

Item No. 2475:

SET 2: 7 x 4 g syringes (shades A1, A2, A3, A3.5, B2, B3, I), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories

Item No. 2462: 4 g syringe, shade A1

Item No. 2463: 4 g syringe, shade A2

Item No. 2464: 4 g syringe, shade A3

Item No. 2465: 4 g syringe, shade A3.5

Item No. 2466: 4 g syringe, shade B2

Item No. 2467: 4 g syringe, shade B3

Item No. 2469: 4 g syringe, shade I

Composan LCM flow

Flowable light-curing micro-hybrid composite

INDICATIONS

- Fillings with minimally invasive preparation technique
- Fillings of small cavities and extended fissure sealing
- Replacement fillings of cavities with undercuts
- Fillings of classes III to V incl. V-shaped defects and cervical caries
- Repair of fillings and veneers
- Luting of translucent prosthetic pieces

CHARACTERISTICS & BENEFITS

- Ideal flowability
- Perfect surface wetting
- Thixotropic properties
- Excellent physical properties
- High translucency
- Perfect polishability

PRESENTATION

Item No. 2678: 3 g syringe, shade A2

Item No. 2679: 3 g syringe, shade A3
→ 3 g syringes incl. 15 application tips

Item No. 2681: application tips, 100 pieces *

Composan ceram

Glass ceramic micro-hybrid composite

INDICATIONS

- Fillings of classes I to V
- Reconstruction of traumatically affected anteriors
- Colour and shape corrections for improved aesthetic appearance
- Locking, splinting of loose anteriors
- Extended fissure sealing for molars and premolars
- Repair of veneers
- Core build-ups
- Especially suitable for composite inlays

CHARACTERISTICS & BENEFITS

- Suitable for all cavity classes
- Easy and fast application
- Optimal handling
- Perfect and permanent marginal seal
- Minimal polymerisation shrinkage
- Superior colour stability: no discolouration
- Excellent translucency
- Perfect adaption to the natural tooth shade
- Can be polished to a high gloss
- High radiopacity

PRESENTATION / SYRINGES

Item No. 2760:

SET: 7 x 4 g syringes (shades A2, A3, A3.5, B2, B3, C2, O), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories

Item No. 2761: 4 g syringe, shade A1

Item No. 2762: 4 g syringe, shade A2

Item No. 2763: 4 g syringe, shade A3

Item No. 2764: 4 g syringe, shade A3.5

Item No. 2766: 4 g syringe, shade B2

Item No. 2767: 4 g syringe, shade B3

Item No. 2768: 4 g syringe, shade C2

Item No. 2770: 4 g syringe, shade O

PRESENTATION / CAPS

Item No. 2710:

SET: 40 x 0.25 g caps (shades A1, A2, A3, A3.5, B2, B3), 4 ml Compobond 1, shade guide, accessories

Item No. 2711: 25 x 0.25 g caps, shade A1

Item No. 2712: 25 x 0.25 g caps, shade A2

Item No. 2713: 25 x 0.25 g caps, shade A3

Item No. 2714: 25 x 0.25 g caps, shade A3.5

Item No. 2715: 25 x 0.25 g caps, shade B2

Item No. 2716: 25 x 0.25 g caps, shade B3

Composan glass

Light-curing compomer

INDICATIONS

- Fillings of deciduous teeth
- Class III and V fillings
- Facetting of discoloured anteriors
- Temporary fillings of class I and II
- Extended fissure sealing

CHARACTERISTICS & BENEFITS

- Continuous fluoride release
- Combines the advantages of glass ionomer cements and composites
- High compressive and transverse strength
- Perfect modelling and polishing
- High colour stability
- Good translucency

PRESENTATION

Item No. 2690:

SET: 40 x 0,25 g caps (shades 16 x A2, 12 x A3, 12 x A3.5), 8 ml Compobond NE, shade guide, accessories

Item No. 2691: 25 x 0.25 g caps, shade A2

Item No. 2692: 25 x 0.25 g caps, shade A3

Item No. 2693: 25 x 0.25 g caps, shade A3.5

Medifil

Glass ionomer filling cement for classes I, III and V

INDICATIONS

- Restorations of deciduous teeth (especially class I)
- Repair of V-shaped defects and enamel erosions as well as root erosions in the cervical area incl. class V fillings
- Treatment of cavities caused by carious lesions
- Fillings of class III and small fillings of class I (incl. extended fissure sealing)
- Build-up fillings under crowns
- Cavity linings

CHARACTERISTICS & BENEFITS

- Excellent biocompatibility, low acidity
- High compressive strength
- Stable and abrasion-resistant
- Tooth-like thermal expansion
- No temperature rise during setting
- Continuously high fluoride release
- Enamel-like translucency
- Excellent radiopacity

PRESENTATION

Item No. 2601:

SET: 3 x 15 g powder (shades A1, A2, A3), 10 ml liquid, 3 ml Copal Varnish LC, shade guide, accessories

Item No. 2602: 15 g powder shade A1, 10 ml liquid

Item No. 2606: 15 g powder shade A2, 10 ml liquid

Item No. 2603: 15 g powder shade A3, 10 ml liquid

Medifil IX

Packable glass ionomer filling cement

INDICATIONS

- Treatment of V-shaped defects and enamel or root erosions in the dental neck area incl. class V fillings
- Restorations of deciduous teeth (especially class I)
- Cavity fillings of class II (not occlusion-bearing) by means of tunnel preparation
- Core build-ups, build-up fillings and linings
- Temporary long-term treatment of class I and II cavities

CHARACTERISTICS & BENEFITS

- Excellent packable consistency
- Strong adhesion to dentine and enamel
- Quick and easy direct application without mixing errors
- High compressive and flexural strength
- Tooth-like thermal expansion
- Superior abrasion resistance
- Moisture tolerant
- Continuously high fluoride release
- Highly biocompatible (does not contain mercury or resin)
- Highly translucent and radiopaque

PRESENTATION

Item No. 2624:

SET: 48 application capsules (shades A1, A2, A3), 3 ml Copal Varnish LC, shade guide, accessories

Item No. 2625: 48 capsules, shade A1

Item No. 2617: 48 capsules, shade A2

Item No. 2626: 48 capsules, shade A3

Medifil IX forte

Glass ionomer filling material

INDICATIONS

- Restorations of class I cavities (not occlusion bearing)
- Semi-permanent restorations of class I and II cavities
- Restorations of class III cavities
- Restorations of class V cavities
- Restorations of cervical lesions
- Restorations of root caries
- Restorations of deciduous teeth
- Base / liner
- Core build-ups
- Temporary restorations

CHARACTERISTICS & BENEFITS

- The product's consistency can be adjusted by a variable mixing time
- The new capsule design is perfect for smaller cavities and areas in the mouth which are difficult to reach
- Easy activation without the need of an activator
- Sculpting is possible right after insertion and the product does not stick to the instrument
- Perfect marginal adaption and easy application
- High compressive strength and abrasion resistance

PRESENTATION

Item No. 2607:

SET: 50 application capsules (shades 10 x A1, 10 x A2, 30 x A3)

Item No. 2608: 50 capsules, shade A1

Item No. 2609: 50 capsules, shade A2

Item No. 2610: 50 capsules, shade A3

Medifil IX forte LC

Glass ionomer filling material

INDICATIONS

- Restorations of class III and V (primarily root caries and cervical fillings)
- Restorations of deciduous teeth
- Small fillings of class I
- Temporary fillings
- Core build-ups
- Linings

CHARACTERISTICS & BENEFITS

- Excellent working time and the setting time is individually adjustable by light-curing
- No need to condition the dental hard tissue
- Suitable for large cavities
- Immediately packable after placement in the cavity
- Does not stick to the instrument and is easy to model
- No varnish required - fill, polymerise and finish
- Fluoride release

PRESENTATION / CAPS

Item No. 2830:

SET: 50 application capsules (shades 10 x A1, 10 x A2, 30 x A3)

Item No. 2831: 50 capsules, shade A1

Item No. 2832: 50 capsules, shade A2

Item No. 2833: 50 capsules, shade A3

Item No. 2834: 50 capsules, shade A3.5

Item No. 2835: 50 capsules, shade B1

PRESENTATION / HANDMIX

Item No. 2836: 12 g powder, 5 ml liquid, shade A1

Item No. 2837: 12 g powder, 5 ml liquid, shade A2

Item No. 2838: 12 g powder, 5 ml liquid, shade A3

Copal Varnish LC

Light-curing varnish for GICs

INDICATIONS

- Protection of glass ionomer surfaces against humidity and dehydration immediately after placing the filling
- Sealing and smoothing of glass ionomer surfaces after polishing
- Sealing of cervical cementation margins right after removal of excess material
- Sealing of linings / build-up fillings before taking impressions

CHARACTERISTICS & BENEFITS

- Ready-to-use
- Easy and fast application
- Safe and durable sealing
- Surface smoothing

PRESENTATION

Item No. 2619: 3 ml liquid

Cica

Etching gel

INDICATIONS

- Etching of enamel and dentine with total-etch technique:
 - in case of composite fillings
 - in case of adhesive fixing of Maryland bridges, inlays, brackets and temporary splinting
 - in case of sealing for caries prophylaxis
 - in case of linings to create a permanent bond

CHARACTERISTICS & BENEFITS

- Contains 35 % phosphoric acid
- Good visibility due to blue colouring
- Thick consistency of the gel for pinpointed and exact application
- Syringe for direct application

PRESENTATION

Item No. 2429: 5 ml syringe etching gel

Item No. 2495: application tips, 30 pieces *

Compobond 1

Light-curing one-component bonding

INDICATIONS

- Direct restorations of all filling classes with light-curing restorative materials in total-etch technique

CHARACTERISTICS & BENEFITS

- 'Stick-immediately effect' for easy application of the restorative
- One-component – one application
- Excellent adhesion
- Perfect physical properties
- Wet-bonding technique

PRESENTATION

Item No. 2676: 4 ml liquid

Compobond LC

Light-curing enamel bond

INDICATIONS

- Bonding agent for use between enamel and light-curing composite

CHARACTERISTICS & BENEFITS

- Quick and easy application
- One-component material

PRESENTATION

Item No. 2415: 3 ml liquid

Compobond U

Universal adhesive

INDICATIONS

- Adhesive for use with methacrylate-based restoratives, core build-ups or luting materials
- Intraoral repair of fillings, all-ceramic restorations and ceramic veneers without additional primer
- Treatment of hypersensitive tooth necks
- Protective varnish for GIC restorations
- Sealing of cavities prior to temporary luting or amalgam restorations

● In combination with Compobond U DCA:

- Direct and indirect restorations using any self-curing or dual-curing methacrylate-based restorative, core build-up or luting composite
- Luting of root posts with dual-curing or self-curing luting composites

CHARACTERISTICS & BENEFITS

- Secure adhesion to various materials (like metals, silicate ceramics, aluminium or zirconium oxide) without additional primer
- Can be applied with or without phosphoric acid etching
- Perfectly suitable for direct or indirect restorations
- Application in one layer => 35 seconds working time only

PRESENTATION

Item No. 2489: 5 ml Compobond U

Item No. 2492: 2 ml Compobond U DCA

Aureocem NE

Self-adhesive, dual-curing composite-based luting cement

INDICATIONS

- Definite luting of inlays, onlays, crowns and bridges (no Maryland) made of ceramic, zirconia, composite and/ or metal
- Definite luting of fibre-reinforced metal and ceramic posts

CHARACTERISTICS & BENEFITS

- Suitable for all material classes
- No etching / no bonding → Fast working
- Short intraoral setting time
- Bubble-free mixing
- Quick and easy cementation of endodontic posts
- Application directly into the root canal with intraoral tips
- Dual-curing for flexibility and safety
- Permanent seal
- Extremely low film thickness (< 10 µm)
- Odourless

PRESENTATION

Item No. 2705: SET: 3 x 5 g auto-mix syringes (shades U, T, WO), mixing tips, intraoral tips

Item No. 2706: 5 g auto-mix syringe, shade U (universal), mixing tips, intraoral tips

Item No. 2707: 5 g auto-mix syringe, shade T (transparent), mixing tips, intraoral tips

Item No. 2708: 5 g auto-mix syringe, shade WO (white-opaque), mixing tips, intraoral tips

Item No. 2703: mixing tips, 50 pieces (tapered cannulae) *

Item No. 2704: mixing tips, 50 pieces (blunt cannulae) **

Item No. 2799: intraoral tips (for 2704), 50 pieces *** *

Aureocem DC

Dual-curing resin-based luting cement

INDICATIONS

- Luting of non-metal or metal inlays, onlays, veneers, crowns, bridges and adhesive bridges (Maryland bridges)

CHARACTERISTICS & BENEFITS

- Very high adhesion to dentine, enamel and metals
- Very low film thickness ($< 10\mu\text{m}$)
- Permanent seal: no water solubility
- Optimal elasticity: stress absorbing
- Radiopaque
- High colour stability

PRESENTATION

Item No. 2685: 10 g auto-mix syringe shade U, 8 ml Compobond LCM (4 ml primer + 4 ml adhesive), 5 ml Cica, 5 ml Ceramic primer, accessories

Medicem

Glass ionomer luting cement

Medicem AC

Glass ionomer luting cement

INDICATIONS

- Attachment of crowns, bridges, inlays, onlays, posts and orthodontic bands

CHARACTERISTICS & BENEFITS

- No temperature rise during setting
- Highly biocompatible, low acidity
- Micro-fine film thickness for occlusal accuracy
- Excellent adhesion to dentine and enamel
- High compressive strength and low solubility

PRESENTATION

Item No. 2438: 35 g powder, 15 ml liquid

Item No. 2451: 15 g powder, 7 ml liquid

INDICATIONS

- Luting of:
 - metal-based and high-strength all-ceramic crowns and bridges on implant abutments
 - metal-based crowns, bridges, inlays, onlays
 - high-strength all-ceramic crowns or bridges
 - prefabricated steel crowns
 - metal root posts or indirect metal post core build-ups
 - orthodontic bands

CHARACTERISTICS & BENEFITS

- High level of translucency
- Easy excess removal, low film thickness and perfect wetting properties
- Continuous fluoride release

PRESENTATION

Item No. 2436: 50 capsules

Ceramic repair

Set for chairside repairs of damaged ceramic workpieces

INDICATIONS

- Intraoral repairs of defects in ceramic or composite veneers, fixed prosthetic work with metal frames

CHARACTERISTICS & BENEFITS

- Permanent, aesthetic repairs
- Easy and time-saving application
- No removal or recementation of crowns and bridges, no need for impressions
- No use of hydrofluoric acid
- Durable, gap-free bond between ceramic / metal and composite
- High bond strength

PRESENTATION

Item No. 2546: SET: 8 x 0.3 ml silane, 1.2 g syringe Opaquer LC, 4 ml Ceramic repair adhesive, 3 x 4 g Comosan LCM syringes (shades A2, A3, A3.5), 8 grinding burs, accessories

Provofil

Light-curing, temporary filling material

INDICATIONS

- All types of temporary fillings
- Temporary protection in inlay and onlay technique

CHARACTERISTICS & BENEFITS

- Easy to model, fast to cure
- Transparent: high depth of curing
- No damage of the preparation
- Perfect adhesion
- Slight swelling effect: safe marginal tightness
- Safe seal for several weeks
- High elasticity
- Advantageous after root canal treatment
- Uncomplicated removal in one piece

PRESENTATION

Item No. 2537: 2 x 4 g syringes

Provilat

Temporary eugenol-free luting cement

INDICATIONS

- Temporary attachments of crowns, bridges and inlays
- Temporary sealings of small one-surface cavities

CHARACTERISTICS & BENEFITS

- Eugenol-free thus low allergy potential
- Suitable for use with composite materials
- Pulp protection: contains calcium hydroxide
- Safe adhesion and elasticity
- Easy removal by cooling with ice spray

PRESENTATION

Item No. 2444:

Paste / Paste system:

25 g base, 25 g catalyst in tubes

Item No. 2535:

Auto-mix syringe:

5 ml auto-mix syringe, mixing tips

Item No. 2536:

brown mixing tips for Provilat auto-mix syringe, 50 pieces

Success CD

Temporary crown and bridge material

INDICATIONS

- Fabrication of temporary crowns, bridges, inlays and onlays

CHARACTERISTICS & BENEFITS

- Less than 1 min. setting time in the mouth
- Auto-mixing, homogenous and bubble-free paste
- Extra short mixing tips for economical and precise application: 40 % less waste
- Very low setting temperature
- Withstands strong functional loads
- Excellent transverse and compressive strength
- Natural fluorescence
- Perfect long-term aesthetics: brilliant enamel-like gloss and high colour stability
- Long-lasting temporaries with precise fit

PRESENTATION

Item No. 2740: 50 ml cartridge shade A1

Item No. 2741: 50 ml cartridge shade A2

Item No. 2742: 50 ml cartridge shade A3

→ all 50 ml cartridges incl. mixing tips

Item No. 2590: blue mixing tips, 50 pieces *

*

Medical

Calcium hydroxide paste

INDICATIONS

- Indirect capping for the treatment of caries profunda
- Direct capping when the pulp is opened or a pulpotomy is performed
- Lining of cavities to prevent exposure to acid media when using cements
- Temporary filling of root canals

CHARACTERISTICS & BENEFITS

- Ready-to-use in a syringe for direct application
- Suitable for use under all lining and filling materials
- Acid-resistant: effective pulp protection
- Contains 45 % calcium hydroxide
- Stimulates the pulp and triggers the formation of tertiary dentine
- Antimicrobial effect due to high pH value

PRESENTATION

Item No. 2551: 2 ml syringe

Item No. 2495: application tips, 30 pieces *

Urbical

Self-curing calcium hydroxide paste system

INDICATIONS

- Indirect pulp capping
- Linings under dental filling materials

CHARACTERISTICS & BENEFITS

- Easy to mix and apply
- Sufficient working time and short setting time in the mouth
- Contains 26 % calcium hydroxide
- Promotes the formation of tertiary dentine
- Recovering of the pulp – preservation of vitality
- Bacteriostatic
- High pH value: antimicrobial effect
- Radiopaque for good diagnostic control

PRESENTATION

Item No. 2441: 13 g base, 11 g catalyst

Urbical LC

Light-curing radiopaque calcium hydroxide

INDICATIONS

- Indirect pulp capping
- Linings under all filling materials

CHARACTERISTICS & BENEFITS

- Higher compressive strength than conventional calcium hydroxide liners
- Excellent adhesion, especially to composites
- Effective protection of the pulp
- Acid-resistant
- Radiopaque
- Ready-to-use: no mixing, no bubbles

PRESENTATION

Item No. 2493: 2 x 2 ml syringes, 20 application tips

Item No. 2634: application tips, 100 pieces *

Composeal

Light-curing glass ionomer composite liner

INDICATIONS

- Cavity linings
- Extended fissure sealing
- Fillings of small lesions

CHARACTERISTICS & BENEFITS

- One-component ready-to-use material
- Excellent adhesion to bonding material
- High flexural and compressive strength
- Acid-resistant
- Fluoride-releasing, against secondary caries
- Universal dentine shade

PRESENTATION

Item No. 2550: 2 x 2 ml syringes, 20 application tips

Item No. 2634: application tips, 100 pieces *

Medibond

Glass ionomer lining cement

INDICATIONS

- Cavity linings
- Core build-ups

CHARACTERISTICS & BENEFITS

- Highly biocompatible
- Self-adhesion to dentine and enamel
- Dentine-coloured
- High compressive strength
- Tooth-like thermal expansion
- Continuous, high fluoride release
- Radiopaque

PRESENTATION

Item No. 2435: 10 g powder, 15 ml liquid

Comosan protect

Light-curing desensitising varnish

INDICATIONS

- Treatment of hypersensitive dentine
- Treatment of cervical areas (incl. crown margins, after tooth cleaning or tartar removal, exposed cervical areas following surgery etc.)

CHARACTERISTICS & BENEFITS

- Permanent sealing of tubules
- Significant reduction of stimulus transfer through intensive, deep sealing of exposed root dentine
- Special filler technology for high abrasion resistance
- Safe adhesion
- Fluoride release

PRESENTATION

Item No. 2424: 4.5 ml varnish, accessories

Fluoraphat pro

Dental desensitising varnish with fluoride

INDICATIONS

- Treatment of hypersensitive teeth
- Treatment of sensitive root surfaces

CHARACTERISTICS & BENEFITS

- Quick desensitisation
- Fluoride release (5 % NaF \pm 22,600 ppm fluoride)
- Protection against acid attacks
- Easy application even on moist surfaces
- Perfect aesthetics: transparent tooth colour
- Pleasant melon flavour

PRESENTATION

Item No. 2725: 10 ml tube melon flavour

Fluodica 10 *duo plus*

Fluoride varnish for deep fluoridation against hypersensitivities

INDICATIONS

- ④ Treatment of hypersensitivities:
 - in cervical areas and at crown margins
 - after professional cleaning and calculus removal
 - after etching / grinding
 - after injury of the enamel (fractures, chips)
 - due to worn occlusal surfaces and teeth carrying braces
- ④ Sealing of cavity margins after restoration
- ④ Dentine protection / lining under amalgam fillings

CHARACTERISTICS & BENEFITS

- ④ Highly effective combination of sodium and calcium fluorides
- ④ Transparent - no discolouration of the teeth
- ④ Intensive remineralisation of the enamel
- ④ Free of methacrylate and glutaraldehyde
- ④ Very economic: up to 300 applications per 4 g
- ④ Forms a protective coat against thermal and mechanical influences

PRESENTATION

Item No. 2478: 10 g liquid

Fisseal

Light-curing pit and fissure sealant with fluorides

INDICATIONS

- Sealing / filling of pits and fissures as well as small cavities
- Sealing / filling of damaged enamel surfaces
- Sealing of carious lesions
- Restorations of small defects in composite and amalgam fillings
- Sealing of deciduous teeth
- Sealing of composite or cement fillings against humidity
- Anchoring of orthodontic appliances and covering of caries predilection sites during orthodontic treatments

CHARACTERISTICS & BENEFITS

- Direct, quick and economical application
- Excellent flow properties
- Perfect marginal tightness
- White colour for application control
- Continuous fluoride release

PRESENTATION

Item No. 2472: 2 x 2 ml syringes, application tips

Item No. 2637: application tips, 100 pieces *

Softliner

Chairside soft denture relining material

INDICATIONS

- Permanently soft relining for total and partial dentures
- For relieving pressure from pressure spots
- To dam the palatal vibrating line
- In cases of flabby ridges and insufficient adhesion
- To cushion sharp-edged alveolar processes
- To support the healing process in implantology

CHARACTERISTICS & BENEFITS

- Chairside soft relining during 1 appointment only
- Special adhesive for extremely high adhesion between denture and relining material
- Special glazing to seal and to smooth treated surfaces
- Smooth, hydrophobic surface inhibits germ and candida development
- MMA-free
- Permanently soft due to A-silicone basis
- High translucency: natural shade adaption
- Superior colour stability and excellent aesthetics
- Neutral in odour and flavour
- Easy to clean

PRESENTATION

Item No. 2580:

SET: 50 ml cartridge, 10 ml adhesive, 10 ml glazing base / catalyst, mixing tips, accessories

Item No. 2738: pink mixing tips, 50 pieces *

Item No. 2553: 50 plates for maxillae in pink

Devices

Dispenser Type 2

- Extruder gun for 50 ml cartridges

Item No. 2726: Dispenser

GIC Activator

- For activating GIC application capsules
- High quality metal alloy
- Easy and hygienic handling

Item No. 2668: GIC Activator

GIC Applicator

- For applying the content of application capsules directly into the cavity
- High quality metal alloy
- Easy and hygienic handling

Item No. 2673: GIC Applicator

Item No. 2495: 30 application tips

Item No. 2634: 100 application tips

Application Tips

Item No. 2637: 100 application tips

Item No. 2681: 100 application tips

Item No. 2536: 50 brown mixing tips

Item No. 2703: 50 mixing tips, tapered canulae

Item No. 2704: 50 mixing tips, blunt canulae

Mixing Tips

Item No. 2590: 50 blue mixing tips

Item No. 2738: 50 pink mixing tips

Item No. 2798: 50 turquoise mixing tips

Instruments

Item No. 2630: 10 plastic-trifil instruments
